

PureFlo® Nylon Filter Capsules

(Nylon Membrane on PP Construction)

PureFlo® Nylon filter capsules are highly retentive, naturally hydrophilic nylon membrane filters that have been specially designed for liquid applications. The nylon membrane in an all-polypropylene construction provides excellent chemical compatibility and superior flow per unit area as compared to other membrane capsules. No adhesives, binders, or surfactants are used in the manufacturing process. All capsules are rinsed with highpurity water to reduce extractables and downtime.

The naturally hydrophilic nylon membrane does not require pre-wetting with IPA and flushing with DI water, thereby eliminating a potential source of contamination and hazardous waste.

All filter capsules are 100% integrity tested to ensure filter performance each and every time out of the package. PureFlo nylon filter capsules are wellsuited for critical applications where superior flow and particle removal efficiency at 0.05, 0.1, 0.2, 0.45, 0.65, and 1.0 micron is required.

Features	Benefits
Naturally Hydrophilic Nylon Membrane (Absolute Rated)	IPA pre -wetting not required- thereby eliminating a potential source of contamination and disposal waste Reduces downtime and improves throughput Economic alternative to PTFE and PVDF Unlike hydrophobic filters there is no dewetting in outgassing fluids
Small Disposable Capsule	Rapid installation reduces downtime Low hold-up volume reduces chemical waste Reduced handling of hazardous chemicals
Ease of Scale -Up	Consistent filtration from laboratory to full production testing
Low Filter Extractables	No adhesives, binders, or surfactants used Capsules are rinsed with highpurity water
