

## PureFlo® Polypro Filter Cartridges

PureFlo® polypropylene filter cartridges are highly retentive, graded porosity polypropylene media filters that have been specially designed for clarification and prefiltration applications. The graded porosity design removes particles in sequence by size– larger particles by the more open outer layers and smaller particles by the tighter inner layers. The outer layers act as a prefilter while the inner layers provide the absolute rating at the specified pore size. This efficiently spreads the contaminants throughout the media matrix resulting in superior contaminant holding capacity, lifetime, and pressure drop as compared to other media cartridges.

No adhesives, binders, or surfactants are used in the manufacturing process. The nonwoven media does not allow migration into the process fluid, thereby reducing the potential for extractables and downtime. Furthermore, the all polypropylene construction provides excellent thermal and chemical compatibility with low and high pH chemicals.

PureFlo polypropylene filter cartridges ensure consistent filter performance each and every time out of the package.

### Materials of Construction

Media: Non-Woven Polypropylene

Media Supports: Polypropylene

Cage, Core, End Caps: Polypropylene

O-Rings: Silicone, EPDM, Viton, Buna N, TES, TEV

### Dimensions (nominal)

Lengths: 5 in. (13 cm), 10 in. (25 cm), 20 in. (50 cm), 30 in. (76 cm), 40 in. (102 cm)

Diameter: 2.75 in. (7 cm)

### Effective Filtration Area

0.6 m<sup>2</sup> (6.4 ft<sup>2</sup>) per 10" cartridge element

### Operating Conditions

Maximum Forward Differential Pressure:

5.0 bar (72.5 psid) at 20° C

2.0 bar (29 psid) at 80° C

Maximum Reverse Differential Pressure:

3.0 bar (43.5 psid) at 20° C

1.0 bar (14.5 psid) at 80° C

Maximum Operating Temperature: 80°C

### Applications

Acids	Ink Jets
Bases	Electronics
Solvents	Pharmaceuticals
Fine Chemicals	Biologics
Plating Solutions	Dyes
Parts Cleaning	Lacquers

### Features

### Benefits

Graded Porosity Pleated Polypro Media	Media matrix removes particles in sequence by size– larger particles by the more open outer layers and smaller particles by the tighter inner layers High flow rates and low pressure drops Superior filter lifetime and process throughputs
100% Polypropylene Construction	Provides excellent compatibility with a widerange of chemicals such as acids, bases and solvents No media migration into the process fluid
Low Filter Extractables	No adhesives, binders, or surfactants are used during manufacturing resulting in superior downstream cleanliness All cartridges are rinsed with highpurity water to reduce extractables and downtime
High Performance Filtration	Consistent and reproducible particulate removal

### Regulatory Compliance

Manufactured from materials that conform to the requirements of 21CFR Part 177 of the U.S. Code of Federal Regulations and USP Class VI Biological Test for Plastics.

### Sterilization & Autoclaving

The filters can be sterilized by autoclaving for up to 25 cycles at 257°F/125°C. The filters can also be sterilized by steam-in-place procedure up to 5 cycles at 275°F/135°C for 30 minutes at less than 0.3 bar differential pressure. The filters can also be sanitized by hot water or common chemicals that are compatible with filter components.

### PureFlo Polypro Filter Cartridge Ordering Guide
